NOTICE TO ALL CUSTOMERS

Implementation of the new vessel access procedure

In order to improve the efficiency of the terminal security regarding the stowaway prevention on the vessels calling our terminal,

We would like to implement the below measures in line with the ISPS code.

The process will be divided into two parts, Terminal access control and vessel gangway access:

- Terminal implementation of the employees check list when at berth;
- The berth security officer will check the list of all stevedores personnel to be visually identified with a badge and PPE allowed to board the vessel;
- The checked list will be submitted to the vessel officer and the berth security officer will require a confirmation from the vessel gangway once all stevedores board the vessel;
- The same process of the check list must be verified by the berth security officer and the vessel gangway to make sure that no stevedoring personnel remains on board after cargo completion;
- Prior vessel departure, extensive stowaway search to be performed by the crew of the vessel for a duration of 30 minutes or 1 hour.

Therefore, we request that from Nov 15th 2020 onwards that the above process go into effect and we look forward to this implementation being supported by our customers as the objective is to improve the security of the vessel access.
