September 01st 2020

NOTICE TO ALL CUSTOMERS

IMPLEMENTATION OF THE OCR SYSTEM

Valued customer,

We inform our valued customers of the launch of the "OCR" (Optical Character Recognition) system at the barriers for all truck license plates operating within SGTD terminal.

This new technology, based on the latest generation of detection and reading of container and license plate numbers, aims to avoid misidentification and would enhance the security of containers leaving the terminal.

To this end, we are asking our kind customers that the license plates of their trucks meet a visibility standard for electronic and optical reading as of **October 1, 2020**.

Thus ,we encourage our valued transporters to have metal plates with two lines of writing according to the formats mentioned in reference.

For more information, kindly contact us at :
